Data Notes

Agricultural Overview

This bulletin covers 27 agricultural industries in the State of California. The number of industries ranges from five to seventeen within each of the six geographic regions. The regions are the San Joaquin Valley, South Coast, Desert, Central Coast, Sacramento Valley, and North Coast (refer to map for details).

The data are organized into the following tables by state and region:

- Wage and Salary Workers
- Average Hourly Earnings

Summary

Employment

Total California agricultural employment for November 2001 decreased 68,200 jobs from the previous month for a loss of 17 percent. Total Agricultural Production decreased 41,900 jobs from October 2001 to November 2001, a loss of 18 percent. Agricultural Services decreased by 26,300 jobs, a loss of 14 percent. Decreases in both Agricultural Production and Agricultural Services are normal for the month of November. The change in California agricultural employment from October 2000 to November 2000 was a decrease of 63,400 jobs.

Grape crops registered the largest decline for the month with a decrease of 17,500 jobs. Farm Labor Contractors registered a significant loss with a decline of 15,100. Cotton crops posted the largest gain with an increase of 3,000 jobs. Total agricultural employment decreased 47 percent in the North Coast Region, 31 percent in the Sacramento Valley Region, 16 percent in the San Joaquin Valley Region, 13 percent in the Central Coast Region, and 13 percent in the South Coast Region. Agricultural employment increased six percent in the Desert Region.

Production and Crop Activity

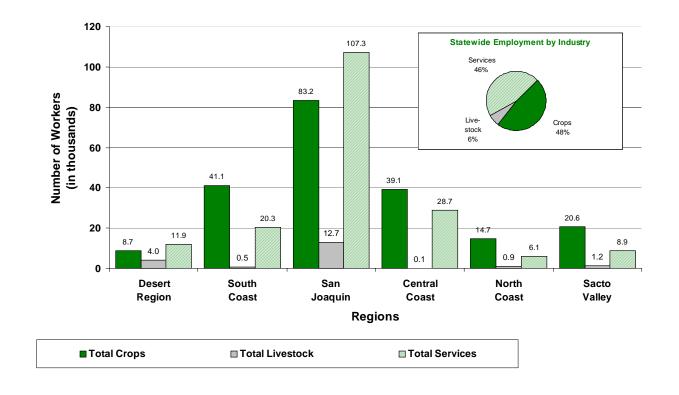

Cotton harvesting continued at a rapid pace through the early month but slowed in the latter half due to wet field conditions. Shredding and discing of harvested cotton fields were ongoing. Growers struggled to complete plowdown requirements before rain saturated the ground. Cutting, windrowing, and baling of Sudan and alfalfa were slowed by rain. Some new alfalfa fields were planted and treated for weed control. Ground preparation for small grain planting was delayed due to wet field conditions. Wheat and oats were planted in some prepared fields. Occasional fields of silage corn and black-eyed beans were still being harvested. The rice harvest was nearly complete with only a few unharvested fields remaining. Lettuce and broccoli fields were treated for worms and other insects. The harvesting of asparagus began in Southern California. Pumpkins and gourds were actively harvested in the San Joaquin Valley. Harvesting of head lettuce slowed in the Huron district and broccoli and sweet corn were harvested in limited quantities in the San Joaquin Valley. Red onions were planted and some fields were prepared for next year's tomato crop. Vegetables harvested, during the month, included basil, bok choy, cabbage, carrots, cauliflower, celery, cherry tomatoes, chili peppers, cilantro, cucumbers, green onions, mustard greens, okra, parsley, radishes, spinach, sugar peas, and banana, zucchini, and other winter squash.

Fruit growers were pruning, discing, and applying soil treatments to prepare the harvested orchards and vineyards for the approaching dormant season. Harvesting of table grapes in the San Joaquin Valley continued after the rain passed. Vines still bearing fruit were covered with plastic to protect them from the rain. Apple picking slowed. Pomegranate and persimmon harvesting continued. Olive harvesting continued in some areas at a reduced pace. The new crop navel orange harvest accelerated as maturity improved. Satsuma tangerines were harvested. Picking of Valencia oranges slowed while lemon picking was active in Southern California. Grapefruit harvesting slowed in Riverside County and the desert areas while Pummelo and Oroblanco grapefruit were actively harvested in the San Joaquin Valley. The almond and walnut harvests were completed. Pistachio Harvesting continued. Pecan growers prepared orchards for harvest.

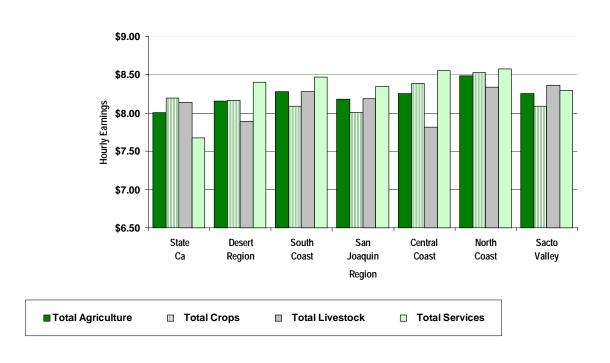

Supplemental feeding of cattle continued. Beekeepers in the central area prepared hives for winter.

Agricultural Summary Charts

DATA NOTES

Data Sources:

These data are obtained from two sources: the Employment Development Department (EDD) Covered Employment and Wages (ES-202) data files and a monthly survey conducted by the California Agricultural Statistical Service (CASS) of the U.S. Department of Agriculture (USDA) and the Labor Market Information Division of EDD of 4,200 agricultural employers. The sample was selected to be representative of the state's agricultural employers by size, geographic location, and industry categories. Sample data are gathered for the survey week that includes the 12th calendar day of the month. All data in this bulletin represent activities taking place during this mid-month period. Same month prior year employment data are benchmarked to the ES-202 data files maintained by EDD.

Data Comments:

To aid in accurate usage and interpretation of the data, please note the following:

- Agricultural Services employment survey data may be recalculated; historical trend information is used to adjust sample data when low response rates occur.
- Regional data may show greater variability than statewide data because of small sample size and variable reporting patterns in specific industries.
- Current month regional estimates are based on the recorded addresses of owner-operators. Same month prior year regional data are based on worksite locations. Significant differences between regional current month and same month prior year data could result, although statewide totals might be comparable.
- Where data cannot be estimated because of inadequate sample reporting, the letters "na" have been entered into the
 field to indicate estimates are not available.
- Wage data include wages of supervisors and hired non-production workers (primarily administrative personnel). Piece rate data are also included where applicable.
- Fishing, forestry, and hunting industry data are not included in the Agricultural Services estimates. Unique seasonal industry patterns of employment make producing employment estimates for these industries problematic.
- Employment data do not include employers of unpaid family workers.
- Agricultural workers who are employed by farm labor contractors are reported in Agricultural Services under that
 industry category. Employment levels in Crop Production and Livestock Production do not reflect their activities in the
 associated industries that contract with the farm labor contractors.
 - Total agricultural employment and hourly earnings estimates in this bulletin are derived from the monthly Current Employment Statistics for Agriculture project. Estimates in this bulletin will differ from other agricultural estimates published by EDD and the USDA because of differences in the number of industries covered and in the definition of agricultural workers.

Subscriptions:

Annual subscriptions are available for \$30.00 per year. Ask for publication number LAU-15. To subscribe or for information, please call (916) 262-2162 or write to:
